

ASSET TRACKING

Find equipment and assets with room-level accuracy to monitor idle, in use or availability status.

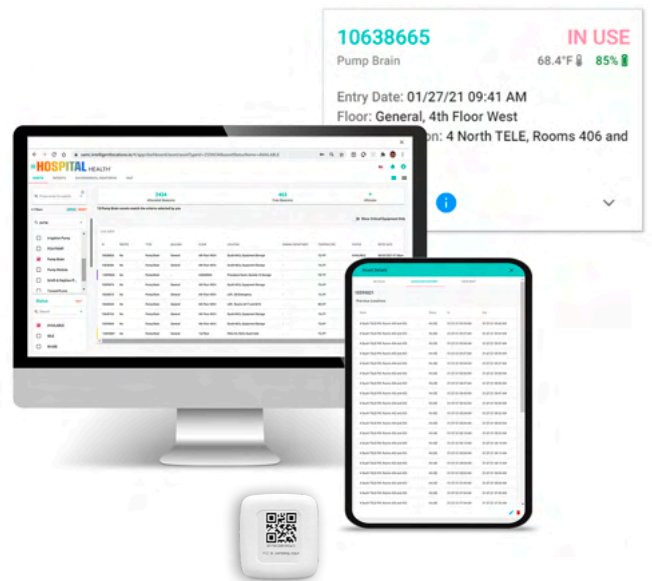

Real Time Location Services (RTLS) & IoT Software For Healthcare

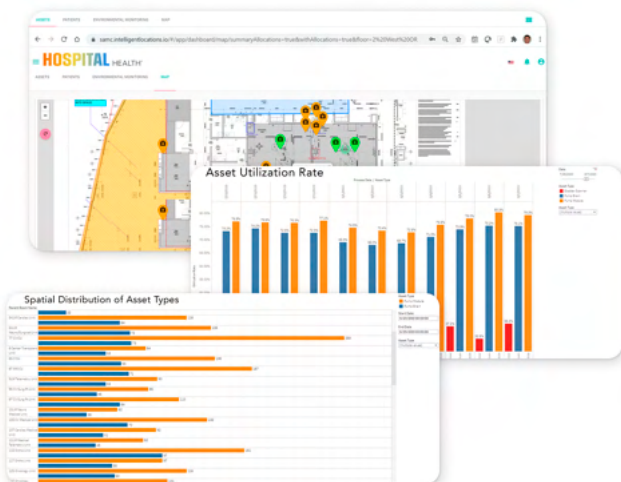

Digitize Your Hospital's Operations

- ✓ Determine Status & Asset Availability Through PAR Level Management
- ✓ Monitor All Assets & Optimize Equipment Utilization Rates
- ✓ Eliminate Waste, Unnecessary Hoarding & Equipment Gone Missing Through Localization Alarms
- ✓ Avoid Long Surges & "Find Times" With Location-Based Interactive Maps of Tagged Assets

Asset Tracking Software Features

1. INTRAX™ determines the status of an asset alerting whether it's available, in use or idle.
2. Using data capture during normal operations, INTRAX™ calculates the utilization rates of all tagged assets in real-time. Our small tag size accommodates a range of equipment — from a crash cart to an IV pump or laptop.
3. Avoid waste by monitoring valuable medical equipment moving inside and outside your hospital system & prevent theft.
4. INTRAX™ measures and optimizes critical equipment availability alleviating the need for long surges leading to dissatisfied patients.

INTRAX™ ASSET TRACKING

Track, Measure & Analyze Any Type of Asset

✓ Imaging & Monitoring Equipment

- Endoscopes
- Bladder scanners
- K thermal machines
- Telemetry monitors

✓ Pumps

- IV pumps
- Feeding pumps
- PCA pumps
- KCI trauma pumps

✓ Carts

- Crash carts
- Airway carts
- Patient transport equipment
- Stretchers
- Wheelchairs
- Patient lifts

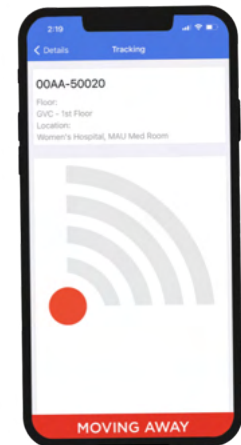

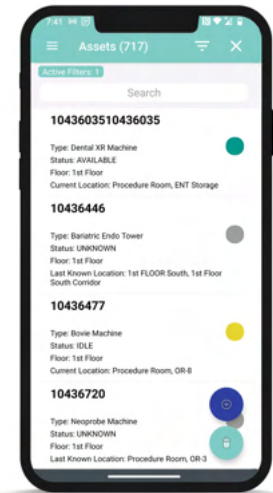

00AA-35246

IN USE

Type: Telemetry Box

Floor: Alamance - 2nd Floor

Location: Alamance Regional Hospital, 258 Bed 3E041

Locate Assets Within 2 Feet Of Distance

Once tagged, INTRAX™ locates assets within 2 feet of distance. Optimize asset utilization, prevent long surges of critical equipment and reduce equipment gone missing by tracking all hospital assets through our cloud-based HIPAA-compliant mobile app and web-based dashboard. Location-based visibility of all tagged assets is readily available on interactive maps.

Obtain ROI & Savings In Weeks — Not Months!

Within a few weeks after implementation at a 300-bed Midwest hospital, INTRAX™ helped achieve immediate savings of \$389,000 in capital spending and \$74,000 on equipment maintenance in IV pump utilization alone. The opportunity to further reduce IV pump inventory by 15% was identified, increasing overall savings.
